Swimming pools are luxury structures that can lead to huge cost implications if not well maintained. To avoid incurring these big costs in the long run, it's important to have a well maintained pool. This means servicing the pumps, unclogging inlets and outlets in case they suck in foreign material like leaves or kids inserting stuff in these openings.

Regular cleaning of the floor and walls is also key to ensure the pool is always looking sparkling clean. In addition to this, the water needs to be regularly treated and replaced when necessary. This ensures the pool is safe to use and works efficiently.

To do all this effectively you need someone with the knowledge on how it's done. That's why we offer the repair and maintenance services for swimming pools. Our services are quite affordable because we want you to save on cost of enjoying the facility. However we can also train your staff to do the maintenance and we only handle repairs in such a case.

For your Swimming Pool maintenance services; regular upkeep and pool care, chemical treatment and PH balancing, hardware repairs, corrosion clearing, debris clearing, clear of algae and mold, clearing dirt, clearing contaminants, chemicals cleaning, cloudy water cleaning, backwashing, dirty water cleaning, green water cleaning, stain removal, bacterial contamination, Pool vacuuming, Skim pool, Tiles maintenance, Cleaning swimming pool deck, routine care one-off service.

6. FIBRE GLASS SWIMMING POOLS

1. Fibreglass swimming pools

Fiberglass swimming pools are “built” in two stages: manufacturing and installation. At the manufacturing stage, fibreglass-reinforced plastic is moulded off-site into a basin shape to fit the required specifications.

Once this is done, a hole is dug at the site and a base material is placed at the bottom of the pit for the swimming pool to sit on. The pool is then transported to the site in one piece.

After the necessary plumbing installation, the swimming pool is lowered into the pit with a crane or any other similar equipment. Backfilling is done round the pool and in most cases a concrete deck is built around the perimeter.
